CS aerotherm stepped into the commercial bakery equipment domain, in the year 1997, with a long-term technical collaboration with FN Aerotherm, Denmark to manufacture rotary-rack (B-900 and B-1300) and electrical deck-ovens and most advanced Diesel, Gas, Electric Rotary Rack ovens. Today our product range not only meets the demand of domestic clients but also find their way to highly satisfied clientele in countries of Indian sub continent, Middle East and Africa.

For the expanding domestic and international client database, our brand 'CS Ovens' stands for quality, variety and dependability.

AUTOMATIC CREAM ROLLING MACHINE

The Automatic Cream Rolling Machine can work with various different kinds of pastries, and is the only automatic device available for small pastry shops that can close both ends of the cream roll. It empowers bakers to use their own recipe. The dough is rolled up through a spiral-rolling process, ensuring it remains puffed up even after baking. Cream Rolls made in this machine are deliciously appealing. You don't have to close the ends of the roll manually. This Automatic Cream Rolling Machine can be configured according to the size of the cream roll to be made. The pipes, necessary for the cream roll production, range from 10 to 20 mm in diameter, and from 90 to 155 mm in length. Start baking easy-to-make, delicious cream rolls and pastries for your customers with our high performance, compact Cream Rolling Machine.

Specifications:

Details	Specifications
Model No.	ACRM-8 / ACRM-11
